## Tax charge

- Total tax charge of £10.8m (2009: credit of £14.1m)

## ETR

- Underlying tax rate of 21.1% (2009: 23.5%).  
Reduced rate reflects increased profits in low tax jurisdictions (e.g. Abu Dhabi & Qatar)
- Significant review and planning undertaken during year to reduce tax rate further - both to the underlying operational tax rate and one-off benefits to the Group's overall charge

## Singapore International Headquarters

- The Group has secured a beneficial tax incentive following the proposal to establish International Headquarters in Singapore. Further planning will be undertaken to maximise this incentive

# Gulf / Middle East

## 2011 preview

- Expect activity levels to reduce further until Q4 when several large downstream onshore projects commence
- Foothold established in India, first project awarded on Petronet's LNG Terminal at Cochin.
- Group sees no effect from current situation in Middle East as majority of operations in large, secure industrial facilities in remote, unpopulated locations predominantly in Qatar, Abu Dhabi and Saudi Arabia.

# Outlook

## Outlook

Expect return to sustained organic revenue growth from H2 2011

Major driver will be construction support services as large capital funded E&C projects commence in gas (LNG) in Far East/Pacific Rim Region and downstream Gulf/Middle East

Expect more modest growth in maintenance support services driven by increasing safety requirements

Group looks forward to a sustained period of high earnings growth from now towards 2015.
