

Cape Insulation

Industrial intelligence
is delivering bespoke
insulation solutions

Maximising insulation efficiency

Cape insulation is focused on the delivery of high performance bespoke mattresses that provide all the capabilities of conventional insulation protection with the added advantage of damage-free removal and application.

All of our mattresses are tailor-made to suit the exact requirements specified by our customers. This simple and efficient process ensures the most cost-effective solution can be found in order to create a mattress that provides excellent performance in all applications.

Cape's mattress systems deliver reliability, flexibility and excellent performance under the most arduous operating conditions. Durable and hard-wearing, they are designed to provide resistance to the harshest of environments, including high temperature steam, acid and chemical attacks.

Designed and manufactured within our ISO 9000-2000 accredited facility at Dalton-in-Furness UK, our bespoke mattress systems meet the demands of both large and small applications. All of which is backed by Cape's international expertise within the world's industrial market sectors.

Products

- Insulation mattresses
- Fire protection mattresses
- Heat tracing mattresses
- Chemical leak detection covers
- Handrail covers
- Acoustic shields
- Foreign material exclusion covers
- Weld protection blankets
- Bespoke covers
- Reinforced scaffold lifting bags
- Scaffold impact guard
- Ladder guard

Sectors

- Power generation
- Petrochemical/process plants
- Offshore
- Marine
- Manufacturing
- Food and drink
- Pharmaceuticals

Application

- Energy saving
- Thermal insulation
- Personnel protection
- Noise reduction
- Deluge protection
- Hostile environment protection
- Stress relieving/weld temperature control
- Chemical leak detection
- Frost protection
- Fire protection

Usage

- Pipework
- Pumps
- Valve fittings
- Flanges/flange joints
- Turbines
- Process vessels
- Modular units
