

### Our services include:

- ▶ Access systems
- ▶ Insulation
- ▶ Specialist coatings & fireproofing
- ▶ Engineering services
- ▶ Oil, liquids and gas bulk storage
- ▶ Refractory linings
- ▶ Environmental services
- ▶ Design and engineering
- ▶ Asset integrity

## 2016 Safe driving campaign

Every day, many of our employees are exposed to the risk that comes with driving to and from their place of work. In the Middle East, a safe driving campaign was run to raise employee's awareness of the risks as well as instilling and improving safe driving practices. A key part of the campaign was the defensive driving training for all employees, with additional focus on our teams of commercial drivers. Important road safety messages, information on vehicle maintenance, safe driving behaviour and passenger's responsibilities were shared on posters and banners displayed at sites and offices, with leaflets and electronic communications also distributed to ensure wide employee coverage and reinforcement of our focus on safety.

The team also mandated the installation of in-vehicle monitoring systems (IVMS) in all commercial vehicles across the region. IVMS allows the teams to monitor both the location of our vehicles and driver behaviour, including acceleration and braking habits along with average speeds. This information can be used to improve employee driving techniques from both a safety and economic perspective, and help the teams appropriately manage and maintain the fleet.

This proactive approach to safety is welcomed by our customers and employees, demonstrating our commitment to our people and our relentless pursuit for excellence in all that we do.
